

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

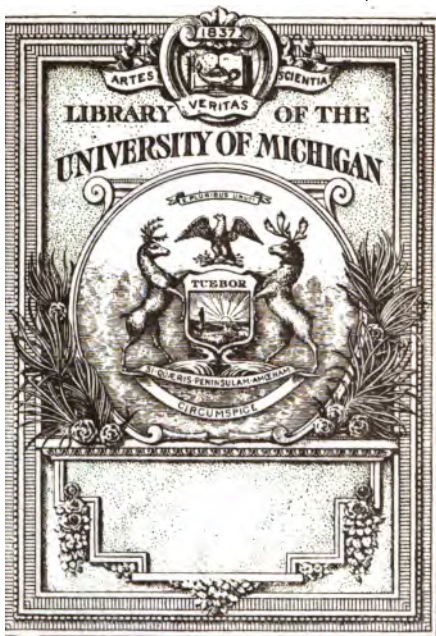

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE.

012 ja 17 L. S.
"The Social Question," says Pope Leo XIII in his encyclical on the condition of the working classes, "is the most pressing question of the hour, and nothing can be of higher interest to all classes, than that it should be rightly and reasonably adjusted. . . . Everyone should put his hand to the work which falls to his share, and that at once and straightway, lest the evil which is already so great become through delay absolutely beyond remedy."

This little catalogue has been compiled to assist those who wish to comply with the Pope's desire. Its object is to introduce the public at large to this kind of literature; to offer some advice in the choice of the books; to help propagating the true fundamental principles of Social Work, which are more necessary than any specialized knowledge; to simplify the labor of those who wish to recommend such publications to friends and libraries; to increase the demand for them and thus to encourage Catholic writers and publishers. It will also, we hope, be found useful in supplementing the catalogues of public libraries.

May it find its way to those who are or should be interested in the Social Question. It can be slipped into letters, disposed of to booksellers' customers in various ways, distributed, on public or private occasions, among members of societies or students of higher institutions of learning.

Though this list is practically confined to writings of Catholics, it will prove serviceable to non-Catholics also; for the books it announces follow the oldest and only reliable

program of social activity, the ten commandments of God.

The titles of other books, together with numerous references, all very well chosen and also drawn from a much wider range of publications than the present list proposes to cover, are found in the excellent little volume which has just left the press, **"A Primer of Social Science,"** by the Rt. Rev. Monsignor H. Parkinson. (This "Primer" is truly a golden book, most helpful to the every-day worker as well as to schools and social study circles.)

I. Ethics.

Michael Cronin, M. A., D. D. The Science of Ethics. \$4.50, B.

Joseph Rickaby, S. J., Moral Philosophy. \$1.50, LG.

Walter Hill, S. J., Ethics, or Moral Philosophy. \$1.25, M.

William Poland, S. J., Fundamental Ethics, \$0.90, Silver, Burdett & Co., Chicago.

Those who wish to go to the very foundation on which rests the whole structure of the social life of mankind will turn to books like these. Here they find scientific answers to such questions as: What is the purpose of man's existence? What does it mean to act morally right or wrong? What is conscience? What is meant by the word "law"? There we find explained the duties of man towards his Creator, of man towards himself, of man to man. Prominent space is given to the three great institutions which are the groundwork of the human race: marriage, private property, the state.

John J. Ming, S. J., Data of Modern Ethics Examined. \$2.00, B.

Like the books mentioned above, this volume expounds the doctrine of true ethics. Father Ming has moreover made it his special object to contrast Christian truth with the tenets of modern unbelievers.

Aquinas Ethicus, or: The Moral Teachings of St. Thomas Aquinas. A translation with notes by Joseph Rickaby, S. J., 2 vols. \$3.75, B.

Though St. Thomas died in 1274, he is still the prince of the Catholic schools, and the principles which he develops from the law of God and the nature of man are still guiding stars of present-day social relations.

Victor Cathrein, S. J., "Ethics," article in the Cath. Encyclopedia (a short summary of the science of ethics).

This latter book refutes indirectly the socialist idea of a merely material and as it were mechanical evolution of mankind and its history.

II. The Social Question.

1) AUTHORITIES.

The Pope and the People. Select letters and addresses on social questions by Pope Leo XIII. With preface by C. S. Devas. The collection contains: The condition of the

working classes—The evils affecting modern society—The Christian constitution of state—Christian citizenship—Human liberty—Christian marriage—The right ordering of Christian life—Concerning Socialism—Workingmen's clubs and associations—Christian democracy. \$0.85, *.

Pius X, On Social Reform. \$0.05, *.

These letters, besides being authoritative guides for us Catholics, are the work of masterminds. No effort has been omitted to embody in them all the principles offered by either philosophy or religion for social conditions. Pope Leo's letter, *On the Condition of the Working Classes*, is a *complete program of social activity*, showing among other points the share which both private enterprise and civil authority ought to take, and what limitations are imposed on them by nature and by God. (See the short article, "Rerum Novarum," by Rev. John A. Ryan in Cath. Enc.)

Leo XIII, Letter on the Condition of the Working Classes, with introduction and analysis by Rt. Rev. Mgr. Parkinson. \$0.05, *.

A. C. Breig, D. D., Papal Program of Social Reform. An Analysis. \$0.25.

While in the booklet mentioned before this, the analysis is printed in the form of a skeleton in the rear, Dr. Breig has placed the headings of which the analysis consists in the text of the encyclical itself. The immense doctrinal wealth of the immortal document is thus brought out very perspicuously. — In the same way the same book reproduces the letter of Pius X on Social Action.

C. Bruehl, D. D., The Encyclical of Leo XIII on the Labor Question. A lecture. \$0.05.

"Persons who have difficulty in finding sufficiently definite social teaching and remedies in the encyclical itself could not do better than to read it with this pamphlet as commentary."

2) POLITICAL ECONOMY.

Rev. Lorenzo Dardano, The Elements of Social Science and Political Economy. \$1.50, B.

E. J. Burke, S. J., Political Economy for Catholic Colleges and Schools. \$1.40, American Book Co.

Charles S. Devas, Political Economy. \$1.50, LG. Low-priced edition: Cloth, \$1.15, postpaid, Ce.

A Synopsis of Devas' Political Economy, Edited by C. D. Hugo, O. P., \$0.20, B.

J. Schrijvers, C. SS. R., Handbook of Practical Economics. \$1.00, postpaid, H. Out of print.

Political economy directs those activities of men which bear upon the material interests of society. It treats of the production of wealth, of the influence of capital and labor and their claims, of wages and taxes, of money, banking and commerce. We should learn these matters from Catholic authors, because non-Catholic writers are liable, entirely or partially, to ignore the fact that, in this activity also, man is bound by the commandments of God.

Hilaire Belloc, The Servile State, \$0.60, T. N. Foulis, London and Edinburgh.

J. E. F. Mann, et al., The Real Democracy, \$1.50, LG.

C. Bruehl, D. D., General Principles of Social Reform. \$0.05, Ce.

John A. Ryan, D. D., A Living Wage. \$0.50, Macmillan Co., N. Y.

John A. Ryan, D. D., A Minimum Wage by Legislation. \$0.05, Ce.

The workingman can in justice demand a wage that supports him; an employer who does not give it commits a sin against the seventh commandment, and is bound to restitution. Father Ryan's book sets forth the validity and nature of this claim.

John A. Ryan, D. D., Minimum Wage Legislation. \$0.01, Ce.

Rev. Patrick Cleary, The Church and Usury,
\$1.10, H.

**Rev. J. J. Welch, Socialism, Individualism, and
Catholicism.** \$0.15, H. (Out of print.)

"Inequality of wealth, poverty, the living wage, mis-
direction of labor, old age pensions, private property,
and many other practical subjects receive brief but
suggestive discussion."

**Cardinal O'Connell, Relations Between Employ-
ers and Employed (Pastoral letter).** \$0.02,
Ce.

**Rt. Rev. Austin Dowling, D. D., The Church and
Labor,** \$0.02, Ce.

3) PRIVATE PROPERTY.

Like most of the following topics, the question of
private property is treated in many books mentioned
heretofore. But for authoritative direction we should
consult the papal documents under II, 1, "Authorities,"
especially "The Pope and the People."

Victor Cathrein, S. J., "Property," article in
Cath. Enc.

**J. Kelleher, Private Ownership, Its Basis and
Equitable Conditions.** \$1.25, B.

**J. B. McLaughlin, The Catholic Doctrine of
Property.** \$0.05, *.

Nearly all the books to be mentioned under Social-
ism devote extra chapters to the subject of private
ownership.

4) SOCIAL REFORM—GENERAL.

**George Metlake, Christian Social Reform;
Program Outlined by its Pioneer Bishop
von Ketteler.** \$1.50, Am. Eccl. Rev., Phila.

Cardinal O'Connell says in the introduction to this
work: "Bishop von Ketteler realized as no other man
of his day, that in the new order of conditions the
Church must not only act but lead social actions, or lose.
We are face to face today with the conditions he met
and set in order. What he did we must now strive to
do." The Month, London, thinks that this work as well
as that of Jos. Husslein should be in the library of every
Catholic reformer.

Joseph Husslein, S. J., The Church and Social Problems. \$1.00, Am.

Declared "indispensable" by our personal acquaintances. Following are some of its 29 interesting chapters: The Christ of Socialism; Did Christ disregard property rights? Communism of the early Church; The Church and labor organizations; Windthorst as social reformer; Social mission of Catholic women.

Henry Day, S. J., Catholic Democracy, Individualism and Socialism. \$1.80, LG.

This work combines, to a degree, the historical sketch of the Social Question, as found in Schrijver's "Handbook of Practical Economics," with an abridged but thorough criticism of Socialism, taken from Cathrein's "Socialism," and a sketch of the constructive program of Catholic Sociology, on the basis of the Christian Democracy.

5) SPIRITUAL RETREATS FOR THE LAITY.

Charles D. Plater, S. J., Retreats for the People: A Sketch of a great Revival. \$1.50, H.

The classic on this subject. "It is not mere knowledge of the Faith, of the Church's constitution and her history, however extensive and accurate, but far more the intensity of the spiritual life and the application of religious principles to every day practice, that will enable the Christian layman and laywoman not only to save their souls, but to play their part great or small in saving the world around them. And this all-necessary deepening of the spiritual life is the work of retreats for the people."

A RETREAT is a withdrawal, a departure from the humdrum and the cares of the workshops, store or office, to devote a few days, under the direction of an experienced guide, to a serious and prayerful reflection on the purpose of our existence.

The St. Vincent de Paul Society is the greatest of
all Catholic lay associations for the relief of poverty
and other social evils. Every Catholic should be in-
terested in this society and assist according to his
means in the support or establishment of a branch of
it in his parish or city.

1) GENERAL.

"Socialists, by endeavoring to transfer the productive possession of individuals to the community at large, strike at the interests of every wage-earner since they would deprive him of the liberty of disposing of his wages."—Leo XIII.

"Can there be any doubt, in any rational thinker's mind, that the Church is opposed, tooth and nail, to Socialism? How could it be different? The Church could not be true to itself if it did not oppose Socialism."—The Call (Socialist newspaper), Nov. 20, 1911.

Leo XIII's letters on "Condition of the Working Classes," "Concerning Socialism," etc. See above under II, 1.

✓ **Victor Cathrein, S. J., and V. F. Gettelmann, S. J.,** Socialism: Its Theoretical Basis and Practical Application. \$1.50, B.

Father Cathrein's book is, perhaps, the principal work on Socialism. Socialists themselves have given the author credit for accurately representing their views. There is an extra chapter in it on Socialism and its strength in this country.

Rev. W. S. Kress, Questions of Socialists and their Answers. \$0.25, H.

These questions have really been asked, some evidently in an endeavor to arrive at the truth. The book (216 pages) is a storehouse of information. It shows what kind of questions socialists are likely to put and teaches an excellent way of answering them.

Six lectures, one of which treats of an example of a Socialistic Commonwealth, namely, Zoar, Ohio.

W. McMahon, S. J., Bebel's Libel on Woman. \$0.05, *.

August Bebel, the most prominent leader of the Socialists in Germany, has written a book entitled "Woman" (Die Frau), which is considered a classic of the Socialist literature. In it he pretends to show that Christ and His Church despise the female sex, that matrimony must be dissoluble at the will of either spouse. The present pamphlet, very painstakingly written, refutes these charges.

✓ **John Ming, S. J.,** The Characteristics and Religion of Modern Socialism. \$1.50, B.

John Ming, S. J., The Morality of Modern Socialism. \$1.50, B.

These three books have much in common, the first showing the entire destructive program of Socialism,

the latter two taking up several points in particular and treating them at greater length. Their charges are supported by numerous quotations from Socialist books and newspapers. The title of Mr. Goldstein's book reminds us of the fact that Socialism repudiates marriage, a fact which drove the author out of the party, and finally prompted him to leave Judaism and embrace that faith which is the only unflinching champion of the unity and sacredness of matrimony, the Catholic Church. When Socialism is in power, every child will be born an orphan, and will soon be turned over to a public nursery.

Charles S. Deas, "Agrarianism" in the Cath. Encyclopedia.

Henry George (died 1896) maintained that no private individual can rightfully own land. This is a kind of *half-Socialism*, since Socialism denies private ownership in every kind of productive property.

As according to Henry George all land-owners are robbers, he proposes to transfer all the taxes to the land, charging to the landholders in the shape of taxes the rent for what they call their property. This is the famous **SINGLE TAX**, a tax on land only. By refuting his arguments and showing that ownership in land is demanded by nature and by God, these writings disprove Henry George's theory.
